### **National Suicide Research Foundation**

#### Goal

To produce a nationally and internationally recognised body of reliable knowledge from a multidisciplinary perspective on the risk and protective factors associated with suicidal behaviour.

#### Research focus

Extent of the problem of deliberate self harm and suicide as well as risk and protective factors

Effectiveness of intervention and prevention programmes for deliberate self harm and suicide

### What is suicidal behaviour?

Suicide

Suicide attempts

Deliberate self harm

- -Hospital/medically-treated
- -Untreated

Suicidal ideation/thoughts/plans

### Suicidal behaviour: an 'iceberg phenomenon'

World Health Level 1 Organization and Irish Central Statistics Office Suicide Suicide Data Level 2 Deliberate self Surveillance studies harm and registries medically treated 'Hidden' cases of Community and Level 3 deliberate self harm and school-based suicidal thoughts studies

### The burden of suicidal behaviour

An estimated one million people die by suicide annually worldwide

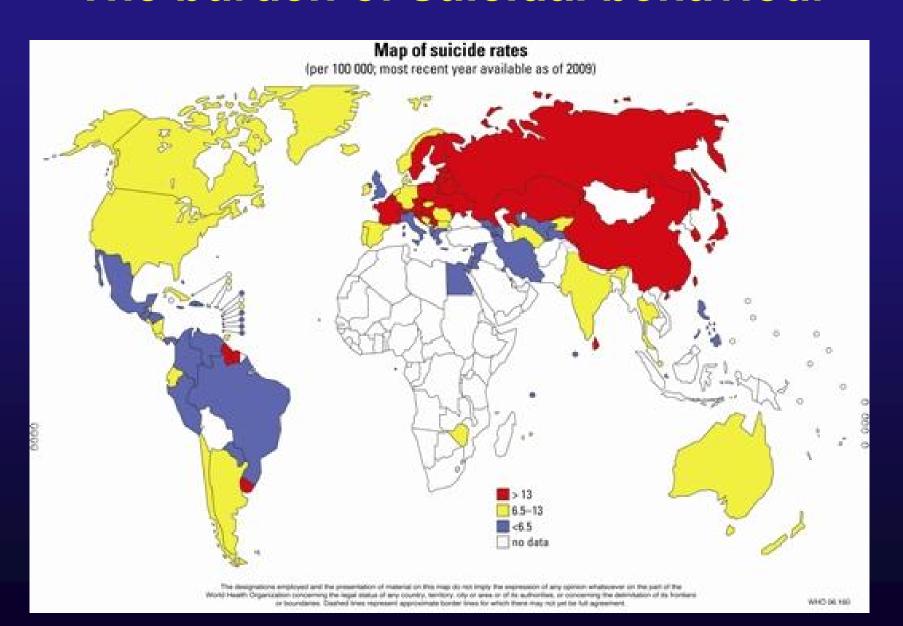

10-20 million people attempt suicide annually worldwide

Suicide accounts for ~1.5% of all deaths and is the 10<sup>th</sup> leading cause of death worldwide

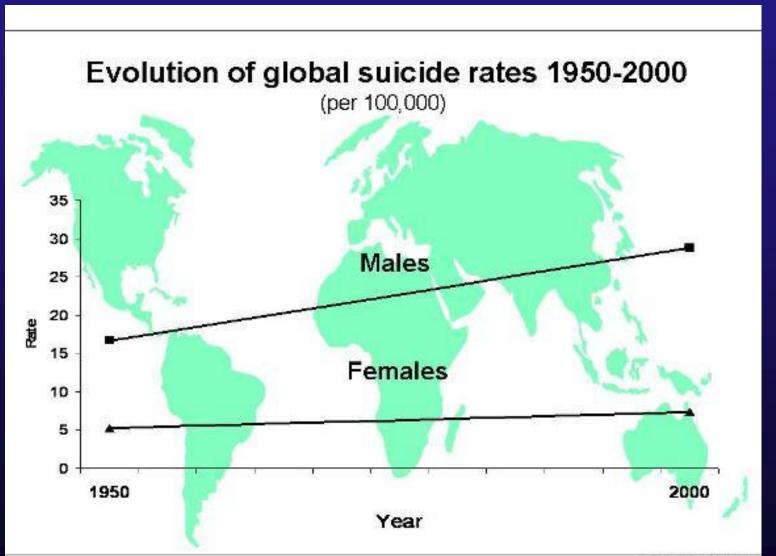

Suicide is the second leading cause of death in 15-34 yearold Europeans

Among 15-44 year-olds worldwide, self-inflicted injuries is the sixth leading cause of disability-adjusted life years

### The burden of suicidal behaviour

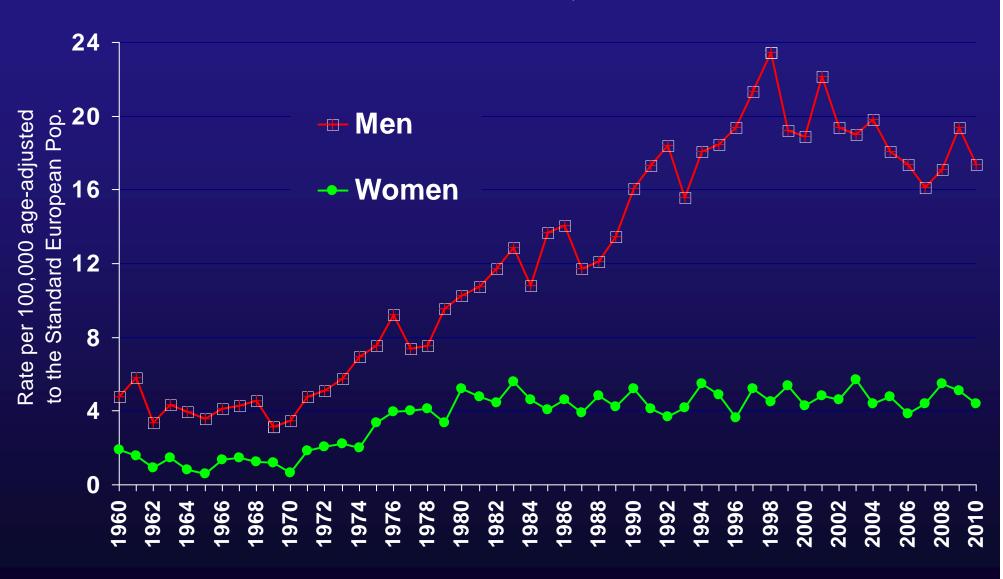

### The burden of suicidal behaviour

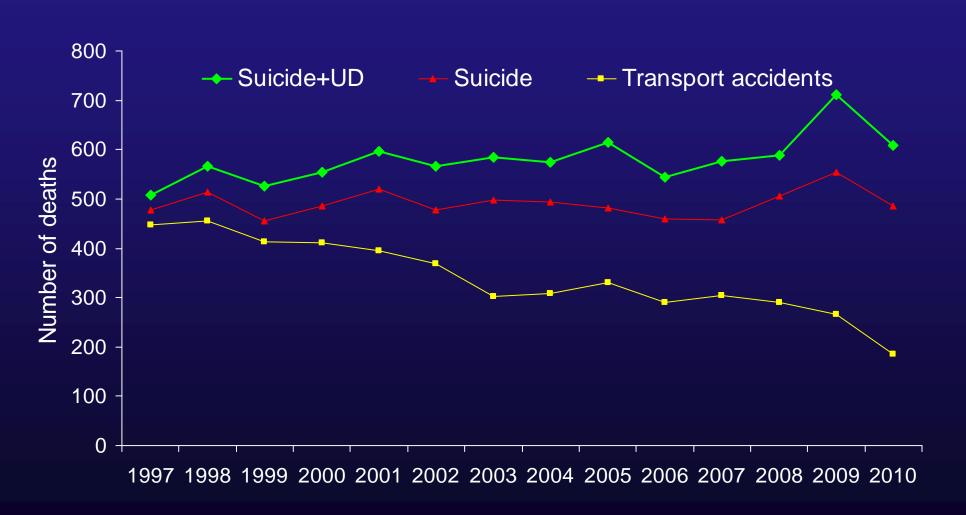

### Recording of suicide in Ireland

- Coroner notified of death by gardai
- Post mortem and inquest
- Coroner notifies registrar of death after the inquest
- Registrar then registers death and notifies the Central Statistics Office (CSO)
- CSO send confidential form to relevant garda sub-district
- Garda provides opinion as to the cause of death and returns form to CSO
  - Suicidal
  - Homicidal
  - Accidental
  - Undetermined
