Depression
When you have problems or life is not going the way you would like, it is normal to feel low or down. This can last for a few hours, days or longer. When it gets so bad that it affects you most of the time, you may be depressed.

You may feel tired all the time, don’t feel like eating or eat too much, have no interest in anything, find it hard to sleep and cannot be bothered with other people.

It is important to recognise the symptoms of depression early and to get help.

What can you do?
It may help if you take some exercise, get involved in some activity or listen to music. Talk to someone you trust, you could also contact one of the agencies in your area who can help. These services are sometimes free. See your doctor who might give advice to attend a counsellor or another health professional.

Deliberate Self Harm
Deliberate self harm is when someone deliberately injures himself or herself. Perhaps they cut themselves, take too many tablets or bang their head against a wall. A person who self harms rarely does so because they want to die, but instead find that hurting him or herself is a way of coping with painful feelings. The person usually knows that this behaviour is not good for them but they have difficulty finding other ways to cope and express their emotions.

If you have ever felt this way it’s important that you:
- Don’t keep it a secret (if no-one knows how can they help you)
- Tell someone you can trust (friend, relative or professional)
- See your doctor
- Contact one of the helping agencies in your area.

Helping a friend through a tough time
Helping a friend through a tough time can be really difficult. Whether your friend is going through a tough time with their family, having trouble with a girlfriend or boyfriend or has a mental health problem, they might turn to you for support and help. Being as informed as possible about the issue is an important first step. Remember that in many situations your friend may need to speak to someone other than yourself. In these situations you can assist them to find some help close by or offer to go see a counsellor with them. Check out the services section of this leaflet for contact details of people or organisations in your local area who may be able to help.

Finding the right sort of help for you
There are many different forms of help available and lots of things to consider when you are thinking of getting help. These include knowing your rights to confidentiality or making sure you are seeing the right person. Finding the right source of help may take time and sometimes the first or second person you talk to does not work out. Check out the services section of this leaflet for contact details of people or organisations in your local area that may be able to help.

Info and Services
What to do in an emergency: Ring 999, this will get you through to the Gardai, ambulance or fire brigade.

Your local doctor: Your local doctor has been trained to deal with any sort of health issue that any person of any age might have. Your local doctor can be a good place to start if you have a worry. They can help you to find different ways to cope and if necessary they can work with you to find a health professional to help you manage.

You will usually have to ring first and make an appointment. You may feel more comfortable seeing a doctor outside of your local area. Check your local yellow pages phone book under Doctors-General Practitioners for a doctor in your area.
